REVISION KNEE: REDEFINED

2 > 8

➤ What if

...the minimalist
sophistication of your
personal life could be
seamlessly reflected in
the operating suite?

➤ What if

...your refined eye for value and technological innovation was about to witness something groundbreaking?

STREAMLINED. EFFICIENT

➤ Welcome to the Revolution

The Exprt™ Precision System–Revision Knee redefines total knee arthroplasty, providing advanced technology that translates into greater efficiency in the operating suite. The system's streamlined, compact design reduces turn times, minimizes waste, and has proven implant design technology - all at 40-70% of the cost of comparable knee revision systems.

SIMPLE. PRECISE

2>8: Value Driven Innovation

A simple, comprehensive 2-tray system replaces the traditional 8-tray setup used during complex, total knee revision, dramatically reducing prep time, eliminating unnecessary surgical steps, and allowing the precision skills of advanced surgeons to truly hit the mark.

PROVEN, EFFECTIVE,
REVISION KNEE TECHNOLOGY

➤ Why Exprt Precision System?

Streamlined, Efficient:

- Advanced technologies improve turn times and reduce waste
- 2-tray system replaces the traditional 8-tray setup

Simple Precise

- Dramatically reduces prep time and eliminates unnecessary surgical steps

Value Driven Innovation

- 40-70% of the cost of traditional revision knee systems
